Olive Tree Planting

The importance of eco-friendly farming

Planting olive trees is a wonderful way for us as a hotel to contribute to the environment and promote sustainable agriculture. We believe that by offering olive tree planting to our guests, we not only provide them with a unique and educational experience but also contribute to the local ecosystem.

They will be informed about the progress of the olive tree by regular updates via email or social media. We hope that our guests will leave with a greater appreciation for the natural world and the importance of eco-friendly farming. Our commitment to this journey doesn't end with the act of planting. We understand the value of connection, and so, our guests

will be kept informed about the progress of the olive tree they planted. Regular updates through emails or social media will serve as a bridge, allowing them to witness the growth and transformation of their contribution. It's a reminder that every action, no matter how small, has the power to create a ripple of change.

A Green Destination

On the path to Zero Waste

“We are fully dedicated to embarking on a journey to redefine luxury by merging high service quality and responsible resource management, reducing waste while increasing our capacity to give.”

At The Chedi Luštica Bay, we are passionate about protecting the environment and excited to share our latest green initiatives! We have implemented several green initiatives to reduce our carbon footprint.

The hotel's daily carbon footprint per occupied room is only 6.15 kgCO₂e/occ room, significantly lower than the global industry average. In addition to reducing its carbon footprint, the hotel has implemented recycling and waste reduction initiatives. Plastic packaging and cardboard are recycled, and food waste is processed to limit the total waste.

The use of plastic is reducing, and eco-friendly water purification systems and reusable bottles offer a sustainable solution to water provision, eliminating the need for single-use plastic water bottles.

The Chedi hotel follows the “Return and Earn” principle with its suppliers for most glass bottles. Also, the garbage disposal is coordinated with Luštica Bay to optimize loads and reduce the number of trips.

The hotel saves energy and water by implementing motion detectors, light detectors, key card power switches, water flow reducers in shower heads and water taps, etc. We are demonstrating our alignment with the values of our guests by committing to sustainable practices by implemented the Green Option via our suitpads so guests can reject daily service.

Through the Save The Planet initiative, we encourage our guests to reduce the use of water, electricity, and chemicals spent for washing towels and linen. Dispensers and biodegradable room amenities such as dental kits, vanity sets, and shaving sets are implemented in all guest rooms. In addition to its green initiatives, The Chedi hotel also has several initiatives aimed at giving back to the community. All linen is donated to hospitals and orphanages, and the hotel has a Giving Bag in guest rooms where guests can

donate items that we will distribute to local associations helping people in need. The hotel also supports local suppliers and constantly looks for new sustainable products to incorporate into its menu. In pursuit of the freshest ingredients, we have decided to grow our own lemons, which we use to make delicious juices for our guests.

The Chedi Luštica Bay is proud to help you charge your electric vehicle quickly and efficiently. One of the initiatives was the first Tesla Destination Chargers in Montenegro in 2018. But that was just the beginning. Since then, we have provided more power stations for electric cars: 3 Tesla chargers and 2 Porsche chargers are available in the hotel parking area for our guests at no cost. We are a part of numerous green certification schemes, such as Green Key and Zero Waste Montenegro, but we chose to go above and beyond by partnering with the Earth-Check Program.
